Governor Kathy Hochul today announced 21 new #VaxtoSchool pop-up vaccination sites to increase vaccination rates among school-aged New Yorkers. On September 21, Governor Hochul [announced](#) a total of 120 sites will take place over a 12-week period statewide. The Department of Health is working with local county health departments, community-based organizations, and healthcare centers on-the-ground to support the establishment of these sites in all regions of the state. Partners, host sites, and outreach efforts are tailored to the communities they are built to serve. New locations are established on a rolling basis in partnership with localities, and more sites will be announced each week over the 12-week period.

"The COVID-19 vaccine continues to be our greatest protection against the virus for eligible New Yorkers of all ages," **said Governor Kathy Hochul.** "In collaboration with community-based partners, our new #VaxtoSchool pop-up sites will help more school-aged New Yorkers get vaccinated so together, we can keep our school communities safe. I urge New York parents, guardians, and school leaders to help ensure that the eligible adolescents in their communities receive the vaccine as soon as possible."

A community-based medical professional will be available at each site to answer any questions parents and guardians of school-aged New Yorkers may have. As another tool to promote vaccinations and ensure access across New York communities [#VaxtoSchool buses](#)—mobile vaccination efforts—are being launched in convenient, youth and school-centric areas statewide. On October 16, the #VaxtoSchool bus will be at the Berne-Knox-Westerlo High School pop-up site in the Capital District.

This announcement builds on New York State's commitment to making the health and well-being of students, teachers and families a top priority. As of October 12, [62.2](#)

[percent](#) of 12 to 15-year-olds and [71.7 percent](#) of 16 to 25-year-olds have received at least one vaccine dose.

Operational days for each of the #VaxtoSchool pop-up vaccination sites for school-aged New Yorkers are below. The full list of #VaxtoSchool sites is available [here](#) and will be updated weekly over the 12-week period to include new sites when they are announced. New locations are established on a rolling-basis, and more sites will be announced each week over the 12-week period.

All New Yorkers who receive their first vaccine dose by October 24 can enter [New York State's #VaxandWin Football Sweepstakes](#) to win prizes from the Buffalo Bills, New York Giants, and New York Jets. Parents or guardians can enter for eligible children. To learn more, interested New Yorkers can visit the site [here](#) and eligible New Yorkers can enter the sweepstakes [here](#).

Children aged 12 to 17 can take the Pfizer-BioNTech COVID-19 vaccine, which is available under Emergency Use Authorization for children ages 12 to 15 and is fully approved for those age 16 and older. The other COVID-19 vaccines are not yet authorized or approved for this age group. If you are a parent or guardian of a school-aged New Yorker, you can also visit [vaccines.gov](#), text your ZIP code to 438829, or call 1-800-232-0233 to find a vaccine location closest to you. Make sure that the provider offers the Pfizer-BioNTech COVID-19 vaccine.

To learn more about the COVID-19 vaccine and school-aged children, New Yorkers can visit our dedicated website [ny.gov/vaxtoschool](#) or follow [@VaccinateNY](#) on Instagram.

Parents are encouraged to make sure their child is up to date on all recommended and required vaccinations. Please visit the [Department of Health website](#) for more information on recommended childhood and adolescent immunizations.
